## PROJECTS

---

### Rent A Dream Car

- The Rent Car project is a web-based application designed to facilitate the rental of vehicles for customers. The system allows users to browse, select, and rent cars based on their preferences and requirements. The platform includes functionalities for both the customer (who rents the car) and the administrator (who manages the fleet and rental operations).
- To provide a user-friendly and efficient platform for renting cars. To ensure secure transactions and data handling. To streamline rental management for administrators, reducing manual effort and improving service quality.
